

Education

- 2018 – 2022 Exp.** **İhsan Doğramacı Bilkent University, BS in Computer Science, Ankara, Turkey**
100% scholarship.
- 2017-2018** **İhsan Doğramacı Bilkent University, PREP, Ankara, Turkey**
- 2013 - 2017** **Aydın Science High School, Turkey**

Course Projects

Web Application – Peak Learn Online Education Platform (CS 342), 2021: Created an education platform for database systems course like Udemy or Coursera using HTML, CSS and JS at frontend. Python with Django framework at backend and SQLite at database. Coded most of the frontend side and queries at database.

Desktop Game – Monopoly Space Edition (CS 319), 2020: Created modified monopoly game in JAVA. Used JavaFX library at GUI. Majority of the game logic and the interface are coded by me. Strategy and Decorator design patterns are used.

Akame Programming Language (CS 315), 2020: An introductory level programming language is created in Lex & Yacc. Tokens are implemented.

Desktop Game – Citizen of the World (CS 102), 2019: Created an educational game in JAVA. The game simply aims to improve Geography and General Knowledge skills at children. Used Swing library at GUI part. Coded GUI for some pages and logic.

Internships & Experiences

JotForm, Part Time Software Engineer, Ankara, September – current:

Working on mainly fixing frontend issues & bugs on JotForm.

Commencis, AWS Cloud Bootcamp Student, Remote, January – March 2022:

Received 6 weeks AWS education and learnt AWS services and usages, deploying apps and hosting at cloud.

Commencis, Web Frontend Software Engineer Intern, Istanbul, July – September 2021:

Coded onboarding project called Digital Library which is a web app for Commencers. Then, implemented frontend part of Garage Sale app that is an app for second hand shopping between Commencers. In both projects, Typescript, React.js, Redux, Gerrit, antd, styled-components, redux toolkit are used.

Trendyol, Frontend Bootcamp Student, Remote, June – August 2021:

Received education about React.js, Vue.js, testing, JS, HTML, CSS and microservices during 8 weeks.

JotForm, Frontend Software Engineer Intern, Ankara, June – July 2021:

Created a forum tool called JotForum. The library enables users to create discussion forums on their website using JotForm forms. Thanks to JotForum library, users do not need any database or backend code to have a forum. For detailed information: [GitHub- JotForum](#) & [jotforum - npm](#)

TÜBİTAK BİLGEM YTE, Software Intern, Ankara, Aug – Sep 2020:

Designed a social event planner that keeps the data of participants and enables people to create social events and participate them. The code can be adapted to React Native for mobile version. At database part, PostgreSQL; at back-end, Spring; at front-end, React.js is used.

Personal Projects

Amazon Clone with React.js, 2020: amazon.com is simply cloned by following the tutorials of Clever Programmer Youtube account.

Covid 19 Tracker with React.js, 2020: A covid-19 information page is created by following the tutorials of Clever Programmer Youtube account. Page shows the daily data of countries and detailed information with graphs.
