EDUCATION

Technical University of Munich

Master of Science (M.Sc) - Informatics

Munich, Germany

Bilkent University

Bachelor of Science (B.Sc) - Computer Science

Ranked 859th among 2,265,895 candidates in the University Entrance Exam; awarded Comprehensive Scholarship.

Ankara, Turkey

EXPERIENCE

Amazon Web Services (AWS) — Amazon Connect

Software Development Engineer

Berlin, Germany

Aug 2025 – Present

- Leave Management team: designed and developed scalable, serverless workflows with **AWS Lambda**, **Step Functions**, **SQS**, **SNS**, **S3**, and **DynamoDB**, orchestrating leave request and approval processes.
- Implemented backend services in **Java** and infrastructure provisioning with **AWS CDK**, following best practices for modular IaC and deployment automation.
- Built and maintained UI integrations in **React (TypeScript)** using **API Gateway** and **GraphQL (AppSync)** for client-service communication.
- Created technical designs and feature proposals for new functionalities in the **Time-Off Management** domain, collaborating with PMs and UX for solution reviews.
- Ensured reliability and observability using **CloudFormation**, **CodePipeline**, and **CloudWatch** for deployment, monitoring, and metrics.

Kertos

Software Engineer (Working Student)

Remote

Nov 2023 – Jul 2025

- Built a **fully automated compliance platform** using **Django (Python)**, **React (TypeScript)**, and **PostgreSQL**, providing data audit and workflow orchestration features.
- Implemented API design, pagination/filtering, and background jobs; improved CI reliability and testing coverage.
- Practiced **Agile/Scrum** with **Jira**; used **ChatGPT API** for generating test and dummy data.

.msg

Software Developer (Praktikum)

Remote

Dec 2024 – Feb 2025

- Co-developed a **Purchase Requisition** app using **SAP Fiori Elements** and **BTP**; implemented UI logic, validation, and deployment steps within a 6-person agile team.

Trendyol (Türkiye's first Decacorn)

Associate Software Engineer

Hybrid

May 2022 – Oct 2023

- Contributed to **Pandora**, Trendyol's internal developer platform: built plugins and backend services with **React**, **TypeScript**, **Node.js**, **Go**, **PostgreSQL**, and **Elasticsearch**.
- Enhanced developer experience for **400+** teams by improving CI/CD with **Argo CD** and monitoring via **Grafana**.
- Co-developed the **Trendyol Career Platform** using **Next.js** and responsive design principles; improved performance and accessibility for public career listings.

Jotform

Software Engineer (Working Student)

Remote

Sep 2021 – May 2022

- Resolved accessibility issues (**VoiceOver**, **WAI-ARIA**) and optimized UI performance in a large-scale **React** codebase for millions of users.

Commencis

Web Frontend Software Engineer Intern

Remote

Aug 2021 – Sep 2021

- Implemented the frontend of an internal marketplace (**Garage Sale**) using **TypeScript**, **React**, **Redux**, **antd**, and **styled-components**; practiced code review with **Gerrit**.

Jotform

Software Engineer Intern

Remote

Jun 2021 – Jul 2021

- Created **JotForum**, a forum package enabling sites to host discussions using JotForm forms without a separate backend; published on **npm**.

SELECTED PROJECTS & BOOTCAMPS

- **ShopCart (Senior Project)** — Developed a mobile app for shopping lists and price comparisons using **Django** (backend) and **React Native** (frontend).
- **AWS Cloud Bootcamp** — Completed a 2-month **Commencis** program focused on **AWS architecture**, **serverless systems**, and operational excellence.
- **Frontend Bootcamp** — Participated in a 2-month **Trendyol** program building projects with **Vue.js** and **React.js**.
